

PROJECT SCOPE	DATE & EXECUTION SCHEDULE
Dual Platform Application Development	Date: September 8, 2026
Windows (.exe) + Android (.apk)	Delivery Timeline: 25 Working Days

PART 1: COMMERCIAL QUOTATION

Total Project Package Cost (Windows Desktop .exe + Android Mobile .apk)

₹ 55,000*

* GST is excluded.

Milestone Payment Terms:

MILESTONE	PERCENTAGE	AMOUNT	TRIGGER CONDITION
Advance Payment	25%	₹ 13,750	Project commencement & PO release
Executable (.exe) Delivery	25%	₹ 13,750	Handover of functional Windows (.exe) package
Final Deliverables	50%	₹ 27,500	Handover of Android (.apk), source code & sample docs
Total Net Commercials	100%	₹ 55,000*	* GST is excluded.

PART 2: PRACTICAL FEASIBILITY & DELIVERABLE TERMS

1. Practical Feasibility Baseline (Absence of Physical Hardware):

Because physical hardware (HC-05 Bluetooth receiver module, physical USB OTG C-Type serial cables, and custom receiver boards) is unavailable during development, **all solution modules, parsing logic, UI rendering, and auto-logging workflows will be built and verified exclusively using the standard test-sample dataset (`gnss\_sample\_100.csv`)** agreed upon during the meeting.

2. Deliverables Practical Feasibility Breakdown:

DELIVERABLE MODULE	FEASIBILITY STATUS	VERIFICATION METHOD (WITHOUT HARDWARE)
NMEA Parser & 1Hz Normalized CSV Engine	Fully Feasible	Tested using simulation playback of the agreed meeting test-sample CSV / NMEA streams.
Windows Virtual COM Stream (.exe)	Fully Feasible	Verified using Windows Virtual COM loopback software and simulated HC-05 9600-baud pulse streams.
Android Type-C OTG Serial Driver (.apk)	Feasible via Protocol Logic	Built against standard Android USB-Serial OTG protocols (D+/D-/VCC/CC pins logic). Physical OTG power draw is subject to phone hardware compatibility.
Android Screen-Off Background Logging	Fully Feasible	Verified via Android Foreground Service, battery optimization exemption, and sleep-lock permissions.
50-Key Authentication Licensing System	Fully Feasible	Verified using hardcoded/fetched token validation engine in v1 build.

Mandatory Terms & Conditions (Non-Negotiable):

1. Feasibility Pre-Confirmation:

2. No Payment Withholding for Hardware Incompatibility:

3. Commercial & Scope Finality:
